

All,

The Coachella Valley Regional Water Management Group (CVRWMG) is pleased to announce our second Public Workshop for the Coachella Valley Integrated Regional Water Management Plan (IRWMP). The IRWMP will be a multi-disciplinary effort to address local water supply, wastewater, stormwater, flood management, and habitat conservation needs in the region. The IRWMP will also be an important tool which the Coachella Valley will use to seek water-related grant funding, including Proposition 84 and 1E funds.

At the Workshop, we will provide an overview of our proposed work plan and schedule for developing the Coachella Valley IRWMP. A key element of IRWMP is to develop solutions to the critical water-related problems facing the region, so the Workshop will focus on clarifying key water management issues to be addressed in the Plan. Following up on that discussion, we will brainstorm potential IRWMP goals/objectives and outline the steps for submitting projects to be included in the Plan. We believe that your organization has a vital interest in the IRWMP and can provide valuable input to the planning process.

The CVRWMG is a partnership formed by the five water purveyors – Coachella Water Authority, Coachella Valley Water District, Desert Water Agency, Indio Water Authority, and Mission Springs Water District. The main purpose of the CVRWMG is to lead development of an IRWMP for the Coachella Valley. However, your participation is essential to making the IRWMP an inclusive and representative Plan that fully conveys the Valley's water management needs to the State.

Please plan to attend this important Public Workshop. Attendees will include management and staff from each CVRWMG agency and our consultant, RMC Water and Environment.

Workshop Date: Tuesday, June 22 at 1:30 – 3:30 p.m.
Workshop Location: Rancho Mirage Public Library,
71100 Hwy 111, Rancho Mirage CA

Please RSVP to Marilyn McKay, Administrative Officer, Mission Springs Water District, (760)329-5169 ext. 144, mmckay@mswd.org. She can answer any questions you may have as well.

Sincerely,
Coachella Valley Regional Water Management Group
